01 Introduction

Vivora is a high-end social platform built for artists to showcase their creativity, discover inspiring work, and connect with a global community. Designed mobile-first, it pairs a deep navy backdrop with metallic green accents for a premium, gallery-like feel that puts the artwork itself in the spotlight.

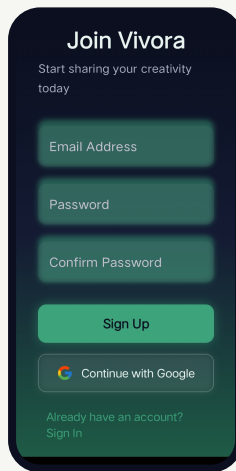

CORE IDEA

The interface stays out of the way — a dark, low-glare canvas that lets color and detail in the artwork do the talking, with social features layered on top rather than in front.

03 Key Features

SECURE ONBOARDING

- **Firebase Authentication** Sign in with Email/Password or Google Sign-In.
- **Smart Onboarding** New users are guided through a Profile Setup screen to establish their artistic identity.
- **Data Security** API keys and Firebase configuration are kept out of source via local.properties and .gitignore.

ARTWORK MANAGEMENT

- | | |
|--------------------------|---|
| ● Cloudinary Integration | High-performance image hosting for fast artwork loading. |
| ● Real-Time Firestore | Artwork metadata — title, description, tags — syncs instantly. |
| ● Dynamic Categories | Filter by Painting, Photography, Digital Art, AI Art, Sketches, and more. |
| ● Full Detail View | High-resolution viewing with full descriptions for every piece. |

SOCIAL CONNECTIVITY

- | | |
|--------------------------|--|
| ● Real-Time Interactions | Like artworks and watch the popularity counter update instantly. |
| ● Follow System | Follow favorite creators and build an artistic network. |
| ● Private Favorites | Save loved pieces to a personal Favorites collection. |
| ● Artist Profiles | Dynamic profiles displaying a user's portfolio and follower stats. |

04 Tech Stack

- | | |
|----------------|--------------------------------------|
| LANGUAGE | Kotlin |
| UI FRAMEWORK | Jetpack Compose (Material 3) |
| DATABASE | Firebase Firestore |
| AUTHENTICATION | Firebase Auth + Google Play Services |
| IMAGE STORAGE | Cloudinary Android SDK |
| IMAGE LOADING | Coil (AsyncImage) |
| NAVIGATION | Jetpack Navigation |

05 Getting Started

- **Android Studio** — Ladybug or newer
- **A Firebase project** — for Auth and Firestore
- **A Cloudinary account** — for artwork image hosting

```
local.properties — add your Firebase and Cloudinary credentials here
before building. This file is gitignored and never committed.
```

06 Branding & Identity

#0B0F1F

Primary Background —
Deep Navy

#3CA37A

Accent — Metallic Green

GRADIENT

Splash & hero surfaces

A custom metallic-green theme, chosen to reduce eye strain while making artwork pop against the dark canvas. Typography follows a clean, bold Material 3 type scale throughout.
